

“Angel is our sweet 6 month old English Bulldog puppy that is suffering from "cherry eye" in both her eyes. A while back I noticed that "cherry eye" had popped up in one of Angel's little eye balls. I took her to the local vet and they tried to correct her eye where she wouldn't have to have surgery. There efforts failed and a few weeks later the other eye developed a "cherry eye" as well. She has to have both her eyes repaired. She may also be suffering from an enlogated soft palate. That will be determined when they do an X-ray before they begin preparing her for surgery. If she is in fact needing her soft palate repaired that will be done at the same as her eyes. At this point Angel's surgery is on hold until I can get the rest of the funds secured. Thank you to anyone that has the chance to donate our family greatly appreciates it. “
