Daisy (nickname for her is Ms. Dolittle) is my 11 year old Chug (Chihuahua Pug mix) who is full of life and love, she is love incarnate. Unfortunately, about 6 days before Christmas, I found out that Daisy has a Mast Cell Tumor through two needle aspirates that were taken, one in the belly and one on the right shoulder. I have since then put her on a new diet, given her new supplements, and received more care from another Vet, to get another opinion. The treatment I seek for Daisy now is an Abdominal Ultrasound with Bloodwork and Chest Radiograph. I want to see if the Mast Cell Tumor is metastasized. If it isn't metastasized then I will have an option for surgery removal from there, but if it has, then I will look at other options from there. I'm seeking quality of life as well as longevity of life for my beloved Daisy. I love my dog very much, and it would be very appreciated if you could donate any amount that works for you. I appreciate you and thank you for listening to my story. God bless you and God Bless Daisy.
