

“Bandit is a six year old chihuahua. We inherited him from my daughters' father three years ago. He had patellar luxation at this time and we knew surgery was imminent. Last week while running at the dog park, he ruptured his cruciate ligament and became lame in his right leg. It's heartbreaking because he's such a spunky little guy. Surgery will be May 11. Please keep Bandit in your prayers. Heartfelt and eternal thanks to Paws 4 A Cure for helping us with this emergency situation. Won't you donate to them so they can help other animals in need, animals like Bandit?”
