Meet Biscuit, a Malti-Poo from Georgia that has bladder stones. Biscuit will receive surgery with the help of Paws 4 A Cure.

Application Accepted: 11/12/14

Read Biscuit's story written by his mom:

My husband and I would like to thank you so much from the bottom of our heart in blessing us with additional assistance for our dog's upcoming and much need surgery. Biscuit was diagnosed with Bladder Stones that are very close in his pelvic area which would potential block his urinary tract and cause severe damage. Our vet initially suggested a certain dietary type of food to dissolve the stones for a 6 week duration to see if that would work. Unfortunately, it did, and the next course of treatment was surgery. I had lost my full-time job and we were and are experiencing a financial hardship because of that, thus making it very difficult to finance this surgery between the range of $514-$685. So, it is with much gratitude and appreciation the WONDERFUL donors that have assisted us to ensure Biscuit doesn't experience any discomfort and that would could potential end his life if left untreated surgery wise. Biscuit thanks you all too!
