

Ceili entered our family at 8 weeks old in 2001, and has been such a big part of it ever since. She has grown up with my two children, ages 11 and 15. (Ceili is 11 also.) We also have a 1 1/2 year old lab named Marley who thinks of Ceili as her mother. Ceili has always been active and loves chasing the deer and squirrels that visit our yard. (She has never even come close to catching anything, which is a good thing). She loves taking long walks and going swimming in our community lake. She also loves the snow and catching snow balls. She is a very loyal and protective dog and you can tell she appreciates all the love she gets from us. I wasn't sure how Ceili would act when we brought a puppy into our house, since it had been just her for so long, but she took to Marley right away. They love to sleep together and one can't go anywhere without the other. The house seems so small when the two of them get to playing and chasing each other around in it. Ceili has always been such a good dog and has never given us a problem. She has been very healthy so far and we really appreciate all the donations for Paws 4A Cure so that she can continue to live many more happy years.

Much love to you and your organization
